

SCHOOLKIT AT HOME

WATCH: How to Make Balancing Sculptures.

TALK: How do the sculptures manage to stay up? What is the 'centre of gravity'? How can it be used to make a balancing sculpture? What objects could you use to try make your own balancing sculpture? How many items do you think you could add to it?

DO: Make a balancing sculpture.

Collect different items from around your house and put them together to make your own sculpture. Try adding more or less items. Did it work? Why or why not?
