

SCHOOL KIT AT HOME

WATCH: The Northern Lights in real time

TALK: What would you think was happening if you saw the Northern Lights over your house? Does anyone in your bubble think the stars have looked different in the sky during lockdown? Has anyone in your bubble ever seen a shooting star? What about a satellite?

DO: Work out what time is it in Churchill, Manitoba, Canada. Go to <https://explore.org/livecams/aurora-borealis-northern-lights/northern-lights-cam> to view the Northern Lights for real.

Use this link to see what stars will be in the sky tonight directly above where you live. <https://www.timeanddate.com/astronomy/night/>

When it gets dark see if you can match the stars on your map to the ones in the sky.
