WATCH: Review the summary of the "Official Mail" exhibition.

TALK: Colombian artist Diana Beltrán Herrera has been passionate about birds since she was just a child. Her incredibly detailed birds are made entirely out of cut paper. The artist carefully attaches together little pieces of coloured paper which

slowly form marvellous 3D bird sculptures.

DO: Plan your own exhibition (make paper birds or whatever you are passionate about) - take note of the detail Diana uses on her website. There's an invitation, promotional material and suggested map for the installation.
