

# SCHOOLKIT AT HOME

**PLAY:** Have a play with the Radio Garden website so you understand how it works. Zoom in and out and spin the globe.

**TALK:** How many countries can the people in your bubble list? Can you list a country (or city) for every letter of the Alphabet? What about a list of countries (or cities) that everyone in your bubble has visited? What about choosing a country that you have a connection to and listing all the cities you know in that country?

**DO:** Take the list you have made. Now use Radio Garden to find and listen to a radio station in every city/country on your list. How many of the places can you find without using the search function and just from searching the globe?
