

SCHOOLKIT AT HOME

WATCH: 5 Amazing Water Experiments

TALK: What did you think about the experiments? Which one was the most surprising? Did you already know about any of these? Are the experiments real? How do you know?

DO: Test the experiments.

Choose one (or all of the experiments) and put them to the test. The video has shown the steps, and the result but how do we know if it's real? Make a prediction for your own outcome and follow the instructions on the video and see if they really work. Don't forget to report back and let us know the verdict.
